

Lebanon Mine Action Center

المركز اللبناني للأعمال المتعلقة بالألغام

The Lebanon Mine Action

Introduction

- LMAC was launched in 1998
- 15 years of success marked by the collaboration of national and international non-governmental organizations participation
- LMAC is continuously working to overcome the challenges in order to meet international obligations.

2013 milestone

- Surveying of all contaminated areas by cluster munitions and analyzing all the existing Data have been completed.
- Nearly 1497 cluster munitions strike have been identified covering an estimated area of 56 sqm.
- Information and maps were filled in the IMSMA NG.
- Dangerous areas were fenced and clearly marked.

Moreover, technical survey teams periodically patrol the areas as to ensure no tampering in fencing and marking.

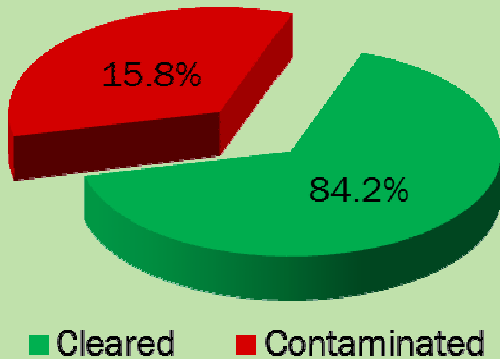

Clearance Statistics till September 2013

Type	Initial		Cleared		Remained	
	Quantity	Surface (m ²)	Quantity	Surface (m ²)	Quantity	Surface (m ²)
Mine Fields	2,287	44,246,852	1,640	20,878,805	647	23,368,047
Minefields / Blue Line	907	7,563,890	24	480,262	883	7,083,628

In conclusion, the LMAC regrettably express its inability today to complete their obligations by the year 2016 unless more funding is secured to finance additional demining teams.

With your support, we continue to thrive in the face of challenges that have befallen us. We rely on your continued support to be able to achieve the targets that we have set together.
